Solution used:

i-House

Client:
Lovell Homes

Location:
Norwich, Norfolk

Services provided:
- Design
- Manufacture
- Install

Project overview:
69-home development. Roofspace Solutions provide the i-House full housing shell to 15 plots.

Product benefit:
i-House is a housing solution, which provides a full, watertight shell ready to receive roof coverings in just five days.

"A plot went from being a concrete pad to us laying the roof tiles within two weeks – everything fits like a Lego set! I think this is a flexible solution that would have really useful applications during the winter or further north, where it typically rains more."

Chris Gray, Senior Construction Site Manager at Lovell Homes
