Solution used:

Panelised Steel Frame

Client:
Spec Projects

Location:
Worcester

Services provided:
- Design
- Manufacture

Project overview:
The former site of Images Nightclub in Worcester has been transformed into 83 student flats.

Product benefits:
By having all the components meticulously panelised, stacked, and prepared well in advance, delays were minimised and the installation process was able to go ahead without delays.

"I also found Intrastack a pleasure to work with. Glitches were minimal and ironed out immediately. In fact, we received great management and support from day one until after the project is complete. I would certainly recommend this system to other developers as the best way to build multi-storey projects."

Paul Hazelwood, Contracts Manager at Intrastruct
